

## TriTerm Medical height and weight charts for adults

Applicants whose weight falls within the ranges shown in these tables will not be denied eligibility based on height and weight alone. Rate ups would apply if your clients weigh outside of the optimal range.

**Optimal** - Your clients whose weight is in the optimal range would be quoted the best possible rate based on height and weight criteria.

**Standard 1** - The Standard 1 ranges include both clients who weigh somewhat less than the optimal range and those who weigh somewhat more. A rate up would apply to those who are in these ranges.

**Standard 2** - The Standard 2 range includes clients whose weight is at the higher end of what would be considered acceptable when determining eligibility. A higher rate up would apply.

**Ineligible** - Adult applicants who fall outside of the height and weight ranges shown here would be considered ineligible for coverage.

*Note: The figures shown are for applicants age 19 or older. Applicants 18 and younger will be treated as if they are within the optimal weight range.*

Height	Weight ranges (in pounds)					
	Optimal		Standard 1		Standard 2	
	Male	Female	Male	Female	Male	Female
4'6"		74 - 111		64 - 73 or 112 - 131		132 - 152
